## Subject: LinkedIn Top Skills 2016

The Global Top Skills of 2016 list reveals several trends about the global job market I chose from among the three skilled.

**Skill#1 Statistical Analysis and Data Mining**:-Scientific progress and the widespread use of technology in every aspect of everyday life has increased the ability to generate and collect data rapidly in this age. This has contributed to the computerization of most of the work, science and services offered daily around the world.

#: Awesome: These screenshots make clear exactly what you were looking at in the dashboard to draw your conclusions.

Through the above picture shows that all countries have employees in this area and there are numbers are optimistic among each country according to the labor market Shows that India got the highest and equal 5 for 2016. Data analysis is based on evolution, ranking and review of best results

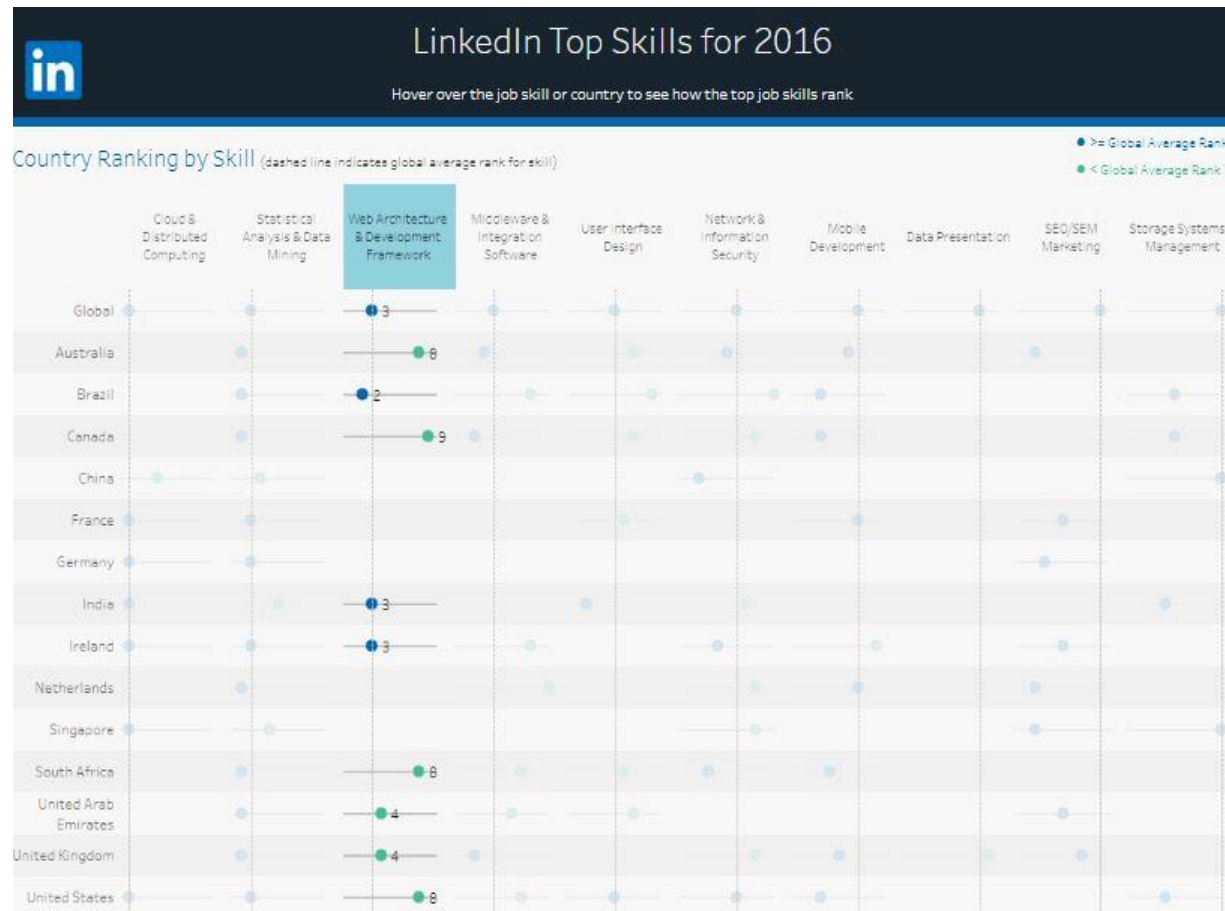

#: Required: you may misunderstand the numbers on the blue and green dots, it indicates the rank of the skill in this country, the green dots means less than the global average and the blue dots means above or equal the global average.
